Your Family's Experience Matters: Multilingual Families of Children with Communication Disability

Researchers from the Australian Catholic University (ACU) are looking for families who:

- Speak more than one language at home
- Have a child with communication difficulties

We want to learn about your family's experiences using communication supports and services.

What does taking part involve?

You can choose to participate in:

• An interview about your family's experiences

and/or

• A video recording of your family communicating together (e.g., at home or in a speech pathology session)

Each activity includes a **gift voucher** to thank you for your time.

Why is this important?

Your experiences will help improve support and resources for children with communication disability in multilingual families.

This study has been approved by the ACU Human Research Ethics Committee (Reference No: 2025-4444H).

Please contact Natalie Skinner who is the primary researcher if you have any questions about the research.
